- Review of the Annual Financial Statements of the Year 2013

- Review of internal audit control assessment and internal Audit
- Select and propose for the appointment of auditor

The Audit Committee agreed that the Company's financial statement was accurate, complete and credible. The Company also followed rules and regulations of the regulator.

Moreover, the Company's internal regulator reported to the Board of Directors that there was no significant transaction that affected the Company.

The Chairman, with the duty as the Chairperson of the Recruitment and remuneration committee reported on performances of the Committee stating that this group of Committees will have its scope, duty, and responsibility in determining the method to recruit Directors, managing directors, as well as preparing the management inheriting plan, determining the policy compensation for Directors, managements, and staffs.

In 2013, the Recruitment and remuneration committee had 3 meetings due to the meeting agenda.

Major performances of the Recruitment and remuneration committee in 2013 are as follows:

- Considered and proposed the term of all Directors and Audit committees for the Board of Directors to consider
- Allowed chance for minority shareholders to nominate names of qualified person in advance through the Company's contact channel for the committees to consider
- Considered for the compensation consideration of the Board of Directors, management, and staff which were revealed in the annual report on the topic of Board of Directors and management compensation to commensurate with the duty, environment, and economic situation, as well as its relation to the business within the same industry.

The Chairman allowed chance for shareholders and proxies to inquire and express viewpoints.

Mr. Paritas Kraitas, a shareholder, asked whether there was any flexibility in expanding SBC branches and whether there was a performance evaluation after a new branch was opened; he remarked that some department stores had two SBC branches while some branches were located in the area with low population.

Mr. Thanong explained that many factors were considered before a new store was opened. Sometimes the company was asked by a business partner to open a store in the location that may not be suitable. In that case the company needed to comply to keep the business connection. However, the company was making sure that not many stores were opened because of that reason. In another circumstance, the company may open a small-sized store in a potential location and they company was asked to open more stores to reduce the risk that the contract between the company and the potential department stores where those small stores are located would be terminated. Anyhow, there were extensive planning and risk evaluation before any store was opened.

Mr. Paritas Kraitas, a shareholder, suggested that in 2014 the company should slow down on new store opening and closing at least 35% of the stores and merging stores located in the same area in order to reduce operation cost such as wages and rental fee.

Mr. Thanong explained that opening a new store with a new department store was necessary. If the new department store had a great potential but the company would not open any store there, the company would lose a good opportunity. Anyhow, the company would evaluate the situation before opening any new store. In addition, on a monthly basis, the company would review the profitability of each store now and in the future in order to decide on closing or merging the stores in a nearby area.

Mr. Boon Jaraschimpleekul, a shareholder, asked why the reserve for loss, depreciation and slow-moving inventory in 2014 was very high and how much the loss reserve in 2014 was.

Ms. Aree explained that the loss reserve was 0.3% of the sales volume. When the goods are lost, the company would deduct it from the reserve. The actual loss value would be recorded. The high reserve was necessary for the slow-moving inventory of imported foreign books that take more than 5 years to sell. Anyhow, when these goods are sold, the income from the sales would be shown as other incomes in the year the goods are sold.

Mr. Krittapol Wipaweekul, a proxy, asked why the profit before EBITDA sharply decreased.

Ms. Aree explained that EBITDA in 2012 the company's other income was unusually high because of the reverse of unused land depreciation in the approximate amount of 17.5 million Baht and income from dividend and interest that was higher than 2013 by 18 million Baht. In addition, the total sales volume in 2013 decreased, causing the gross income to decrease by almost 70 million Baht. There was also the reserve for the slow-moving inventory, which was mostly imported books, in the amount of 51 million Baht.

Mr. Paritas Kraitas, a shareholder, asked whether the company had a solution to prevent loss for every branch.

Mr. Thanong explained that the company did not install the EAS system in every store because of the installation cost and the cost in installing the signal on the books. Therefore, the company selected the stores with high loss risk so that it would be worth the cost of installation. However, for the stores with low loss risk, the company would install CCTV system to facilitate the operation within the stores.

Mr. Paritas Kraitas, a shareholder, asked about the performance of stationery goods and toys in the stores.

Mr. Thanong explained that many SBC stores were renovated to increase the profitability rate per store. The company would consider the types of goods available in each store to make sure they could generate profits. At the same time, the company made sure to maintain the bookstore image of the stores.

Mr. Nitipat Tampiroj, a proxy, asked about the proportion of income and expense of SE-ED Learning Center.

Mr. Thanong explained that the income from SE-ED Learning Center was still small because most of the branches were opened late last year and it also took time for parents to be familiar with the center. However, the center showed a positive sign of improvement. Anyhow, the investment for multimedia and animation contents for SLC was complete. The further investment will be responsible by the franchisers such as the franchise fee, general fees and decoration. SE-ED Learning Center will be one of the main businesses that generate profits for the company in the future.

Mr. Paritas Kraitas, a shareholder, asked about the company's solution to handle the effect from the corporate tax that would be adjusted from 20% this year to 30% and the value added tax that would be adjusted from 7% to 10%.

Mr. Thanong explained that the book business was exempted from the value added tax; the company would only be slightly affected by the increase.

Ms. Aree explained that the corporate income tax would be adjusted to 30% in 2015 according to the Royal Decree.

Mr. Paritas Kraitas, a shareholder, asked how the company would cope with the change in the behaviors of consumers that prefer social media to reading books; how the company would encourage people to read more.

Mr. Thanong explained that the change did not only affect the company but the overall book business. There needed to be a campaign to promote reading. Moreover, in case e-book reading became popular, the company already prepared facilities to handle and adjust to the change. Moreover, the company planned to expand its business with SE-ED Learning Center, to sell a solution to schools that need improvement in English and Math, and to sell more nonbook goods in the stores.

The Chairman allowed chance for shareholders and proxies to query and comment. There was no shareholder and proxies ask any additional question.

The meeting considered and voted.

Chairman announced the vote result as follows:

| Total number of shareholders who attended the meeting and held the right to vote | VOTE 'AGREE' | VOTE 'DISAGREE' | VOTE 'ABSTAIN' |
|--|--------------|-----------------|----------------|
| 253,214,987 | 244,896,474 | 6,875,752 | 1,442,761 |
| 100% | 96.7148% | 2.7154% | 0.5698% |

The Meeting resolution: The Meeting acknowledged the report on operation of the company in the year 2013, and majority votes approved the Company's Annual Report of 2013, as well as the Board of Directors Meeting Report of 2013.

Agenda 3 To consider and approve the Company's Statements of Financial Position as of December 31, 2013, the Income Statement and the Cash Flow Statement, which are audited by the auditor of the year 2013.

The Chairman invited Mr. Thanong Chotisorayuth, the managing director, to report on the amount of money in the Statements of Financial Position and profit-loss report of the year 2013, which the Company had already sent the financial information to the shareholders along with the invitation letter, with the detail information as follows:

In 2013, the company's major performances are as follows :

- The company and subsidiaries had the net profit, according to the consolidated financial statement 2013, in the amount of 72.29 million Baht, a drop of 65.4% (209.09 million Baht). The causes of the decrease included the minimum wage increase to 300 Baht a day in every province and the adjustment of starting salaries for bachelor degree's holders working for government to 15,000 Baht per month. As a result, the company's cost of employee wages increased. Even though the government reduced the corporate income tax from 23% to 20%, it could not compensate the increasing expenses. In addition, the book business could not adjust the prices of books which were the main products to respond to the situation. The aggressive competition of department stores and the changes in customer's behavior were also a factor.
- **Cash flow**

Unit: THB million

| | Consolidated financial statements | |
|---|--|-----------------|
| | 2013 | 2012 |
| Cash flow received (used) from operation activities | 61.25 | 242.94 |
| Cash flow received (used) from operation activities | (330.28) | (330.12) |
| Cash flow received (used) from operation activities | (82.28) | (136.37) |
| Cash flow increase (decrease) | (186.75) | (223.37) |

Cash flow was spent on the installation of rack, buffer, conveyor, decoration, building system and other equipment in the warehouse and computers for new branches.

Cash flow gained from financial activities, from short-term loans from commercial banks to spend on the construction of the new warehouse and the dividend payment of Q4/2012 due in May.

For the financial status of the Company as of 2013 in comparison to 2012, the detail is as follows:

- Total Asset As of December 31, 2012 the company and its subsidiaries had a total of THB 2,599.46 million down THB 28.78 million or 1.10% from the end of 2012. That was because of the temporary sold investment to spend on the construction of the new warehouse. However, the company now has more properties and a warehouse.
- Total liabilities, the Company and its subsidiaries had a total liability of THB 1,628,.96 million, down THB 62.40 million or 3.69% from the end of 2012. That was mostly because of the decrease of major accounts payables due to the drop in sales volume.
- Shareholders' equity The shareholders' equity of the company and subsidiaries was in the amount of 970.50 million Baht; the equity of the main company in the amount of 909.86 million Baht, an increase of 34.30 million Baht because:
 - The net profit of 2013 in the amount of 72.29 million Baht;
 - The retained earnings decreased from the dividend payment in the amount of 60.64 million Baht;
 - The capital stock increased from the dividend stock in Q4/2012 in the rate of 10 original shares : 1 new share; in the total amount of 35.63 million Baht.
- The Company ROA from the consolidated financial statements is 3.58%.
- The Company ROE from the consolidated financial statements is 8.10%.

All shareholders can see in addition to financial statement and annual report.

The Chairman allowed chance for shareholders and proxies to inquire and express viewpoints.

Mr. Krittapol Wipaweekul, a proxy, asked whether the loss reserve in 2013, which was high, would affect the company's profit in 2014.

Ms. Aree explained that the high reserve for loss, depreciation and slow-moving inventory was due to the slow-moving inventory of imported books that were expected to take more than 5 years to sell. Therefore, if the company were able to sell slow-moving inventory in the coming years, it would be the realized income.

Mr. Krittapol Wipaweekul, a proxy, asked whether the short-term current cash spent in the construction of a new warehouse, which was a long-term investment, would affect the cash flow management of the company.

Ms. Aree said that the money spent in the construction was not due. However, the Board had a resolution to approve the long-term loan in the amount of 500 million Baht and had already informed the Stock Exchange of Thailand.

The Chairman allowed chance for shareholders and proxies to query and comment. There was no shareholder and proxies ask any additional question.

The meeting considered and voted.

Chairman announced the vote result as follows:

Agenda 8 Other business. (If any)

The Chairman announced that for the purpose of transparency in the meeting and to allow equal right to all parties involved, the Company will not add any more agenda in addition to what stated in the meeting booklet, as it may be unfair for those shareholders who did not attend the meeting to exercise their voting right.

The Chairman allowed chance for shareholders and proxies to inquire and express viewpoints.

Mr. Wasan Banreungsri, a shareholder, asked about the business direction in the future; which business would be expanded and which would be reduced; and whether the company had any opportunity to make profits with AEC market.

Mr. Thanong explained that the company tried to maintain the book customer base, which is a large customer base, and tried to make profits from this business. Anyhow, the company was faced with the increase in expenses such as labor wages and logistics; the company had asked for a corporation from publishers in giving more discounts for the new books, which would relieve some of the expenses. In addition, some of the small-sized stores that could not generate profits would be shut down, which may affect the overall sales volume but in the long term it would help to improve the situation in the company.

Moreover, the proportion of nonbook goods in the stores would increase. The customers would be able to buy more nonbook goods, especially in the category of innovative products that could not be bought anywhere but at SBC. This adjustment was also in line with the changes in bookstores around the world.

On the other hand, there would be more emphasis on the sales through se-ed.com and se-ed Application, which was mainly the reason from the construction of the new warehouse which would support customers that did not shop at SBC. Goods available in those two channels include both books and nonbook products.

The company also aimed to sell the solution package to education institutions. In the first phase, the solution would focus on English, Math and STEM education. SLC also offers Math and English programs as well as iKids program which was designed under STEM Education and integrated Science, Technology, Engineering and Mathematics in the curriculum. Children would have the opportunity to apply these fields. The iKids program would focus on the innovation that was related to robots, science and technology.

The operation management would also be improved, especially in the IT system and the logistics system.

Associate Professor Yuen added that the changes in customer's behavior drove the company to adjust their products and services such as the opening of SE-ED Learning Center and the sales of solution package to educational institutes. That was because the educational market was expanding; parents were willing to spend money on their children's education. The company, therefore, would focus on the education business in the form of service instead of books. The service should be another way to increase profitability of the company.

Mr. Chaiwat Sripawatkul, a shareholder, asked why the operation results of the company decreased significantly more than Amarin's and whether the construction of the new warehouse provided a satisfactory return.

Mr. Thanong explained that the company's main business was in retail, which was different from Amarin's. The businesses of other companies may generate profits from advertisements and events. Each company had its own strength.

Mr. Pongpan Sivilai, a shareholder, suggested that the company should put a serious effort in expanding the e-book market because the company had an advantage in having a large e-book catalogue; so this market should be possible.

Mr. Thanong acknowledged the suggestion of Mr. Pongpan Sivilai.

The Chairman allowed shareholders and proxies to view their opinion and questioned some more. However, there was no shareholder or proxies shared their view or ask any question.

The Chairman thanked the shareholders and proxies who took time to attend this shareholder's meeting and called for ending of the meeting.

Meeting Ended at 5:17 p.m.

After the meeting started at 2:00 p.m. there were additional shareholders and proxies registering for meeting. There were 77 shareholders attending the meeting in person and 141 shareholders represented by proxies, totaling 218 shareholders representing the total 253,235,348 registered shares or 64.61% of the total 391,944,418 registered paid-in-capital shares. As there were more than 25 shareholders and proxies attending the meeting and there were more than one-third of said shares, it was considered adequate under the Company's regulation.

After the meeting was adjourned, the meeting organizer rechecked the voting result from the ballots that were retained as evidence; an error was found in the voting result of agenda 5.3 (in regards to the appointment of a director in place of the director who retires by rotation: Mr Phairat Sittakul) and agenda 7 (in regards to the remuneration fee for directors in the year 2014). Nonetheless, the accurate voting results are displayed above.
